Medicare Part B premiums for 2013 and 2014 are based on your modified adjusted gross income (MAGI) for 2011 and 2012 respectively. To calculate your MAGI you add the following amounts to your adjusted gross income as reported on your individual tax return:

- Tax exempt interest,
- Interest income from Series EE bonds used for education and excluded from AGI, and
- Foreign income excluded from AGI.

The above tables are based on your Medicare Part B premiums being deducted from your monthly Social Security Benefits.
